

Conversion Charts 1

The colorways numbers below stand for Hand-Dyed or Hand-Overdyed thread colors (exception for DMC*), the conversion indicating **approximate** equivalents. Please, note that Valdani manufactures its **own original colors** and colorways, that is why we offer you approximate equivalents. Other reasons why the colors are not identical: there can be several shades of multiple colors in a "From" colorway; also a difference from batch
 *The DMC colors are machine-dyed solids, while Valdani is all Hand-Dyed in solid and variegated or shaded colors. Replacing a solid with a shaded/variegated color will give you Depth and Dimension (added Beauty), while the solid color is just flat.
